

Installation directions for WFMM

1. Download wfmm_v2_0.zip to your PC.
2. Create a directory such as c:\bin and unzip all files from the zip file into it using
3. Winzip.
4. Open a command prompt window and cd to your directory. Install the Side-by-Side runtime DLL's for C++ on your PC by running vcredist_x86.exe.
5. If you want to run WFMM from another directory without specifying full filepath, add the wfmm directory to your PATH variable. Otherwise cd to the directory or specify full filepath, such as c:\bin\wfmm.
